Price breakdown, care plans and ownership

Real Food by Maria · Updated November 9, 2026

Everything in one place, so you can lay it next to your other options: what the $2,000 pays for, what it costs each month after launch, what isn't included, and who owns what.

How to use this guide

Section	What it answers
Step 1 — The build	What the $2,000 covers, piece by piece
Step 2 — Payment schedule	When you pay
Step 3 — Care plans	The monthly or yearly cost after launch
Step 4 — Other costs	What you'd pay to other companies, and video storage
Step 5 — Ownership	What's yours and what's ours
Step 6 — Compare side by side	A checklist for your other quotes

Step 1 — The build: what the $2,000 covers

Piece	What you get	Price
Website + members area	Home, courses, course pages, free classes, join page, members area, link page for your Instagram	$1,500
iPhone & Android apps	The same platform as apps in the App Store and Google Play, published for you	$1,250
Private video player & hosting setup	Private video storage, links that expire, no download button, resume and speed memory	$400
Owner dashboard	Add lessons, upload videos and files, schedule live classes, see members and the waitlist	$350
Total		**$3,500**
English + Spanish	Every page and lesson in both languages, with a switch	$500 value, included
Case-study discount	In return for letting us show the project in our portfolio, plus a short review	–$1,500
You pay		**$2,000**

> The case-study discount is the only discount. The $2,000 price and the payment schedule below are the full offer.

Step 2 — Payment schedule

When	Amount
At signing (to start the build)	$1,000
At launch (when it's live on the web and in the stores)	$1,000

After launch, you have 14 days to report anything that isn't working as agreed, and we fix it at no cost. The first 2 months of the care plan you choose are free; billing starts in month 3.

Step 3 — Care plans after launch

A care plan keeps the website and apps online, secure and up to date. You can pay monthly, or yearly and save 35%.

Plan	Monthly	Yearly (35% off)	Yearly works out to
Essential Care	$79/mo	$617/yr	about $51/mo, save $331
Standard Care (recommended)	$150/mo	$1,170/yr	about $98/mo, save $630
Priority Care	$300/mo	$2,340/yr	about $195/mo, save $1,260

Essential Care

- Website and app stay hosted, secure and online
- App Store and Play Store updates 4 times a year
- Questions answered in 5 business days
- If your app is down, a reply in 1 business day (weekdays only)
- Content changes and new features are quoted separately

Standard Care — everything in Essential, plus

- Content updates included: send photos and videos any time, published every month
- App store updates every month instead of 4 times a year
- New features and improvements on request, plus one major update each year (like a page redesign, or new pages or tools), with no separate bill
- If your app is down, a reply in 4 hours instead of 1 business day, nights and weekends included
- Questions answered in 2 business days instead of 5
- Your requests move ahead of Essential clients

Priority Care — everything in Standard, plus

- Content updates every week instead of every month
- Two major updates a year instead of one
- If your app is down, a reply in 2 hours instead of 4, nights and weekends included
- Questions answered in 3 business hours instead of 2 business days
- First in line, ahead of every other client

> You add your own lessons, videos and live classes from your dashboard on every plan. "Content updates" means changes to the pages themselves (photos, text, sections) that we do for you.

Step 4 — Other costs (paid to other companies)

Cost	Who you pay	Notes
Card processing	Stripe	2.9% + 30¢ per payment on a standard US account. Taken from each payment, no monthly fee.
Your domain	Your domain company	You already own it; you keep renewing it as you do today.
Live classes	Zoom or Google Meet	Your existing account. Free plans have time limits.
Apple and Google developer fees	None for you	The apps are published under our developer accounts.
Video storage	Included up to 100 GB	See below. Past 100 GB, Cloudflare's price at cost.

Video storage

Your lesson videos are stored privately on Cloudflare. Cloudflare's first 10 GB a month are free, and there's no charge for people watching (no bandwidth fees).

How much video fits depends on how it's recorded:

Recorded as	Size per hour	Fits in the free 10 GB	Fits in 100 GB
Straight from an iPhone (1080p)	about 3.6 GB	about 3 hours	about 28 hours
Exported for the web (1080p, smaller file)	about 1.8 GB	about 5½ hours	about 55 hours
720p	about 1.1 GB	about 9 hours	about 90 hours

- **After the free 10 GB,** storage costs $0.015 per GB a month: about **$1.35 a month at 100 GB**, and about $1.50 a month for each 100 GB after that.
- **What's included:** your care plan covers storage up to 100 GB. A weekly 15-minute lesson adds about 13 hours of video a year, so 100 GB is about 2 years of weekly lessons recorded straight from a phone, or about 4 years exported for the web.
- **Past 100 GB,** Cloudflare's charge is passed on at cost, with no markup. We'll tell you before you get close.
- **Downloads** like recipe cards and PDFs are tiny and don't change these numbers.

> We'll show you the export setting that cuts file size in half without a visible loss in quality.

> Unlike Kajabi or Teachable, there's no platform fee and no cut of your sales. Members pay you through your own Stripe account.

Step 5 — Ownership: what's yours and what's ours

Yours	Ours (Code With Ruben)
Your domain name	The platform: the code, design and building blocks behind the website and apps
Your content: videos, recipes, photos, written text and downloads	Hosting setup
Your brand: name, logo and photos of you	The App Store and Google Play listings and accounts
Your Stripe account and every payment members make	

In plain words

- **You own everything you make and teach.** Your videos, recipes and brand are yours, and you can use them anywhere, on this platform or any other.
- **We own the software that shows it.** When the build is paid in full, you get a license to use the platform for your business, for as long as you keep a care plan. This is how we keep the price at $2,000 instead of a full custom build, and why updates, hosting and support are handled for you.
- **If you stop the care plan,** the license ends and the website and apps go offline. Your domain, content, brand and Stripe account stay yours.
- **If you'd rather own the software too,** there's an Ownership Upgrade (buyout): we hand over the code, files, store listings and accounts, and from then on you or your own developer run it. It's quoted on request.

Step 6 — Compare side by side

Use this to line up your other quotes. Our answers are filled in.

Question	Code With Ruben	Option 2	Option 3
Price to build	$2,000 ($1,000 + $1,000)		
Monthly cost after launch	From $79/mo, or $617/yr		
Website included?	Yes		
Members area included?	Yes		
iPhone and Android apps included?	Yes, published for you		
English and Spanish with a switch?	Yes, included		
Private video player with no download?	Yes		
Dashboard to add lessons yourself?	Yes		
Live class schedule with reminders?	Yes		
Platform fee or cut of your sales?	None, only Stripe's card fee		
Who owns your content?	You		
Who owns the software?	Code With Ruben (buyout available)		
Video storage cost	Included up to 100 GB, then at cost		
Who do you call when something breaks?	Ruben directly
