DLS Lawn Services Admin Guide

All admin changes save to Firebase Realtime Database and update the live app immediately.

How to Access Admin

Navigate directly to `/admin` on your domain. Admin is URL-based and intended for team use.

Site Structure

Route	Page	What admin controls
`/`	Homepage	Hero, services, trust content, contact details, quote + booking entry points
`/admin`	Admin panel	Orders, calendar, subscriptions, quotes, inbox, documents, customers, dashboard content
Worker view (role-based)	My Jobs / Timesheet	Worker-assigned jobs and logged hours (from Admin assignments)

Admin Panel — Main Tabs

Top-level admin tabs include: **Overview**, **Orders**, **Calendar**, **Subscriptions**, **Quotes**, **Inbox**, **Documents**, **Customers**, and **Dash**.

Tab — Overview

Use this tab for quick business visibility and recent activity.

What you can do

- View at-a-glance performance and activity
- Jump into customer records, jobs, and conversations
- Track operational status without switching tabs repeatedly

Tab — Orders

Use this tab to run day-to-day jobs from scheduled through complete.

Steps

1. Search and filter orders Use search + status filters to narrow the list.
2. Open an order card Review customer details, services, schedule, and current status.
3. Manage job lifecycle Update job state (scheduled / in progress / done), add notes, and track work progress.
4. Handle payment workflow Send payment links, record offline payment methods (cash/check), and finalize billing flow.

Tab — Calendar

Use this tab to manage schedule by date.

What you can do

- View appointments by calendar day/week context
- Open related jobs directly from calendar entries
- Coordinate worker assignments against scheduled work

Tab — Subscriptions

Use this tab to manage recurring service customers.

What you can do

- Create and edit recurring plans
- Pause, resume, skip, or cancel subscriptions
- Generate and track linked recurring orders

Tab — Quotes

Use this tab to process inbound leads and quote requests.

Steps

1. Review new quote requests See customer contact info, address, and scope details.
2. Update quote status Move requests through pending/contacted/completed workflow.
3. Start customer communication Send follow-ups from the inbox workflow when needed.

Tab — Inbox

Use this tab for customer communication and follow-up.

What you can do

- View customer/admin message threads
- Send replies and reminders
- Keep communication tied to real customers and jobs

Tab — Documents

Use this tab to handle professional estimates and invoices.

Sub-sections

- **Estimates**: build from quotes or saved records

- **Invoices**: generate from orders and payment state

What you can do

- Preview PDF documents
- Share, download, and email estimates/invoices
- Keep documents linked to customer/job history

Tab — Customers

Use this tab to manage customer records and service context.

What you can do

- View customer history (orders, quotes, estimates)
- Edit customer details and service location info
- Launch job creation or chat directly from customer detail

Tab — Dash

Use this tab for business content and configuration blocks.

Dash sub-tabs

- **Services** — service catalog, pricing structure, add-ons
- **Our Work** — portfolio entries / project showcase
- **Workers** — team members, hours view, worker setup
- **Testimonials** — approve/reject/manage testimonials

Payments and Billing Notes

- Stripe payment-link workflow is supported in admin flows
- Offline methods (cash/check) can be tracked in order/payment handling

- Estimate + invoice PDFs are available in Documents
- Job/payment state updates are reflected across customer and order views

---

Worker Experience (Role-Based)

Workers can access a dedicated **My Jobs** interface with:

- Assigned order list
- Job detail access
- Timesheet / hours visibility

Assignments and operational state are controlled from Admin.

Quick Reference
