GrippySocks Admin Guide

Aim N Shoot Records · Expo web app · Admin at `/admin`

All admin changes save to Firebase Realtime Database and take effect immediately on the live site.

How to Access Admin

Navigate directly to `/admin` on your domain There is no link to admin from the public site — it is URL-only.

Site Structure

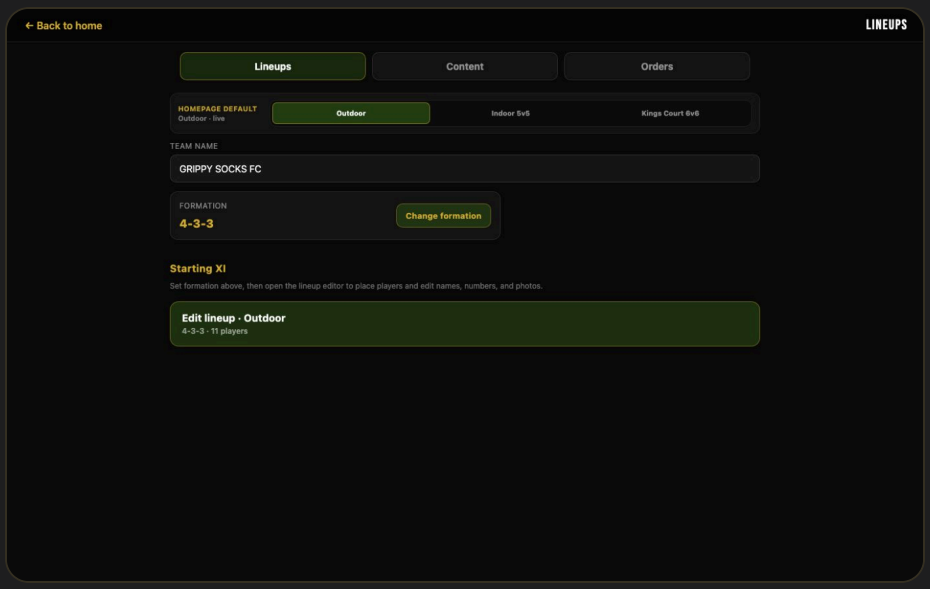

Route	Page	What admin controls
`/`	Homepage	Featured YouTube video, Instagram carousel, team lineup
`/store`	Grippy Socks store	Product price (via Orders tab)
`/linktree`	YouTube link list	All links (via Content tab)
`/checkout`	Checkout form	— (customer-facing, no CMS)
`/admin`	Admin panel	Everything above

Admin Panel — Three Tabs

The admin panel has three equal-width tabs at the top: **Lineups**, **Content**, and **Orders**.

Tab 1 — Lineups

Use this tab to control the team formation shown on the homepage and to edit every player on the pitch.

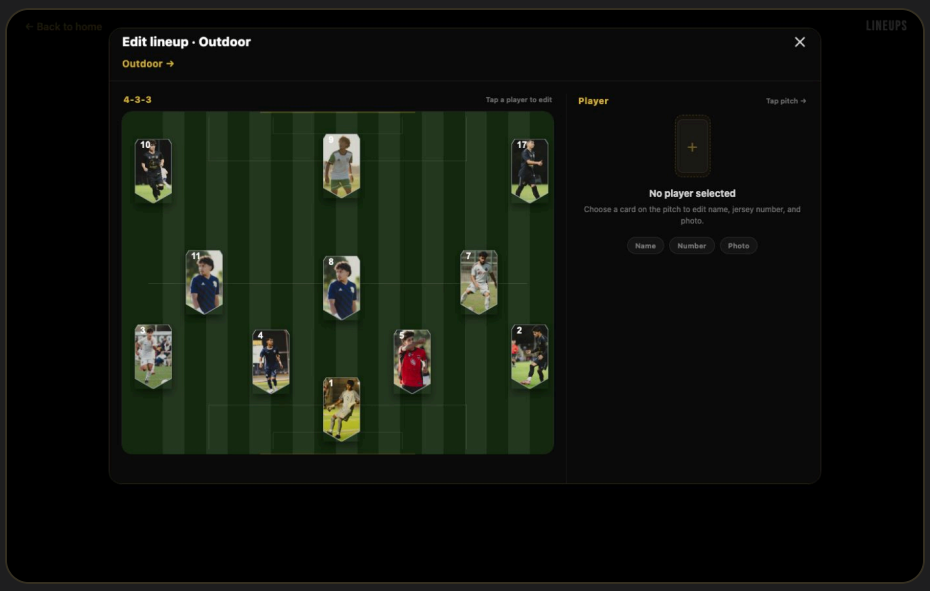

Admin Lineups tab

Steps

1. Choose the homepage mode Click **Outdoor**, **Indoor 5v5**, or **Kings Court 6v6**. The selected mode is the one visitors see on the homepage. The label beneath the selector shows which mode is currently live.
2. Edit the team name Type directly in the **Team Name** field. This is shown as the lineup title on the homepage.
3. Change the formation Click **Change formation** to open a formation picker with dot-preview layouts (4-3-3, 4-4-2, 3-5-2, etc.). Formation presets are saved per mode.
4. Open the lineup editor Click **Edit lineup · Outdoor** (or the relevant mode button) to open the full-screen pitch editor.

Lineup Editor

Lineup editor overlay

The editor shows the full pitch with all player cards positioned in the current formation.

5. Tap a player card on the pitch The right-hand panel switches to that player. Fields appear for name, jersey number, and photo.

6. Edit name and jersey number Type directly in the Name and Number fields. The card on the pitch previews the change in real time.

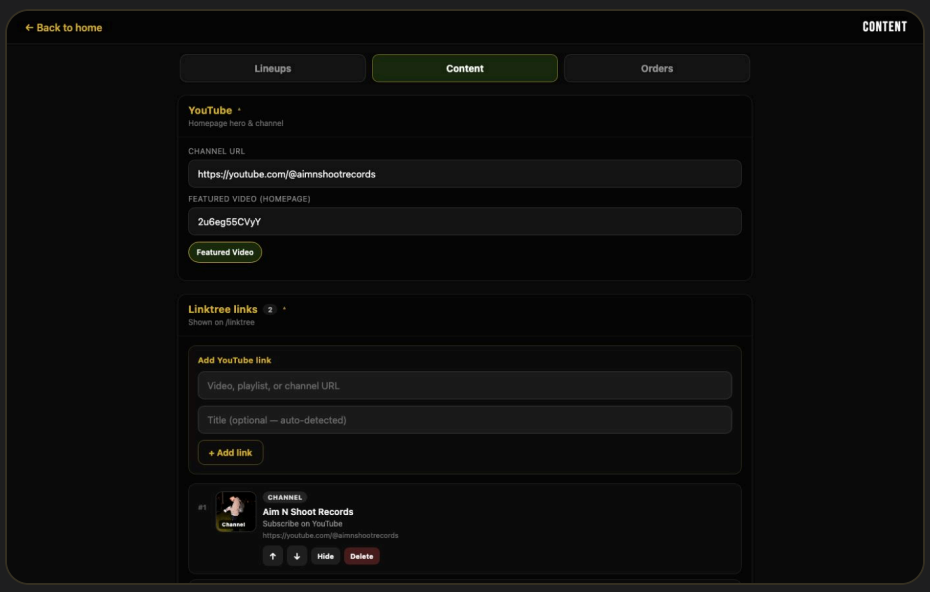

7. Upload or import a player photo Three options:

- **Upload** — drag-and-drop or file-pick a photo (WebP/JPEG/PNG). Uploaded to Firebase Storage.
- **Instagram import** — paste an Instagram post URL to pull the player's photo automatically.
- **Stock images** — choose from the bundled player silhouette images.
- **Clear** — remove a custom photo and revert to the default placeholder.

8. Switch between modes Tap **Outdoor →** at the top of the editor to jump to 5v5 or Kings Court without closing the overlay.

Tab 2 — Content

Use this tab to manage the YouTube hero video, the Linktree page, and the Instagram carousel.

Admin Content tab

YouTube section

1. Channel URL Paste the full YouTube channel URL (e.g. `https://youtube.com/@aimnshootrecords`). Used for the "Watch on YouTube" button in the site header.

2. Featured video (homepage hero) Paste the YouTube video ID (the string after `?v=`). Or click **Featured Video** to pick from your existing Linktree list.

Linktree Links section

3. Add a new YouTube link Paste a video, playlist, or channel URL into the Add YouTube link fields. The title is auto-detected from YouTube or you can type a custom one. Click **+ Add link**.

4. Reorder links Use the ↑ ↓ arrows on each link card to change the display order on `/linktree`.

5. Hide / Delete a link

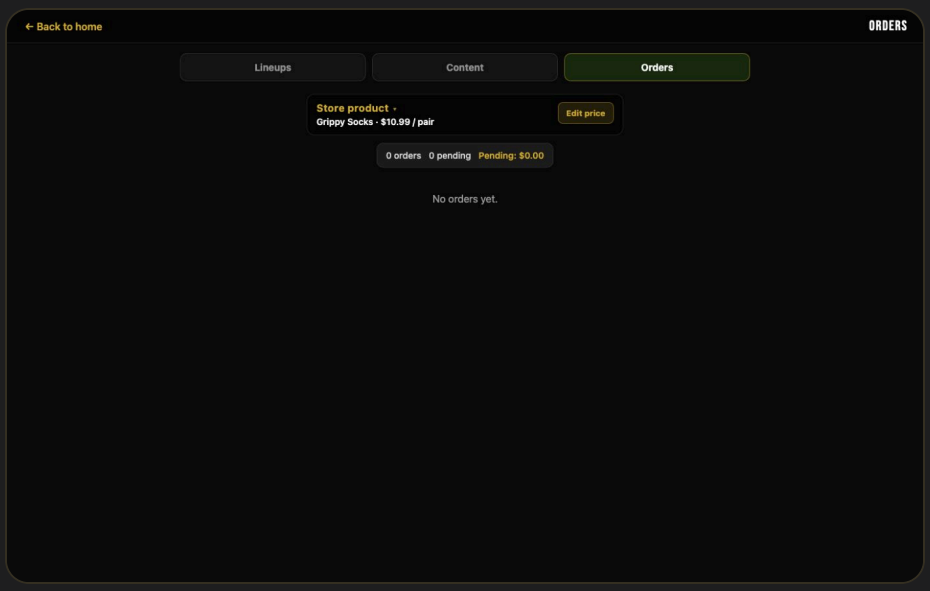

- **Hide** — keeps the link in the database but removes it from the page.
- **Delete** — permanently removes the link.

Instagram section (below the fold)

6. Add Instagram posts Paste Instagram post or reel URLs. Add an optional caption and custom thumbnail URL.
7. Reorder / Hide / Delete Same controls as Linktree links.
8. Save all content One **Save content** button pushes all three sections (YouTube, Linktree, Instagram) to Firebase atomically. The homepage and Linktree page update immediately.

Tab 3 — Orders

Use this tab to monitor store orders in real time, update the product price, and receive browser push notifications.

Admin Orders tab

Product price

1. Edit the product price Click **Edit price** next to _Grippy Socks · $X.XX_. Type the new price and confirm. The store page reflects the change instantly.

Order management

2. Read the summary bar Shows total orders placed, how many are pending, and total pending revenue. Updates live from Firebase — no page refresh needed.

3. Review each order card Each order card shows:

- Date and time placed
- Payment method (Cash on Delivery or Stripe)
- Status pill: **Pending** or **Completed**
- Customer name and phone number
- Delivery address (tap to open in Maps)
- Line items (product, quantity, size)
- Order total

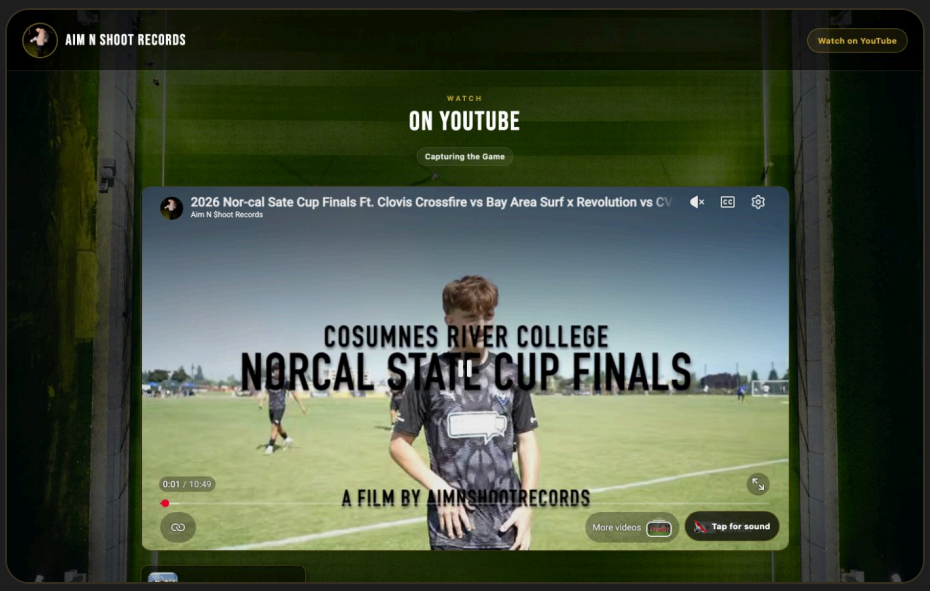

4. Mark an order complete Tap **Mark completed** on any Pending order. Sets `status: completed` and `paid: true` in the database.

5. Delete an order Tap **Delete** to permanently remove an order from the database. Use for test orders or cancelled cash pickups.

Public Pages Reference

These pages are fully CMS-driven. Every admin save reflects here immediately.

Homepage `/`

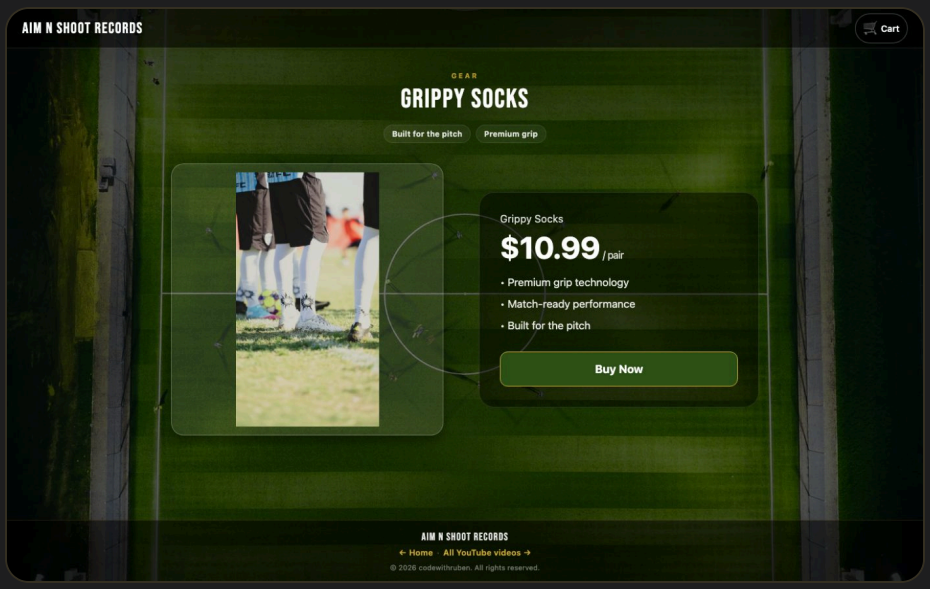

Homepage

- YouTube hero video → controlled by Content tab (Featured video ID)
- Instagram carousel (below the fold) → controlled by Content tab (Instagram section)
- Team lineup section (below the fold) → controlled by Lineups tab

---

Store `/store`

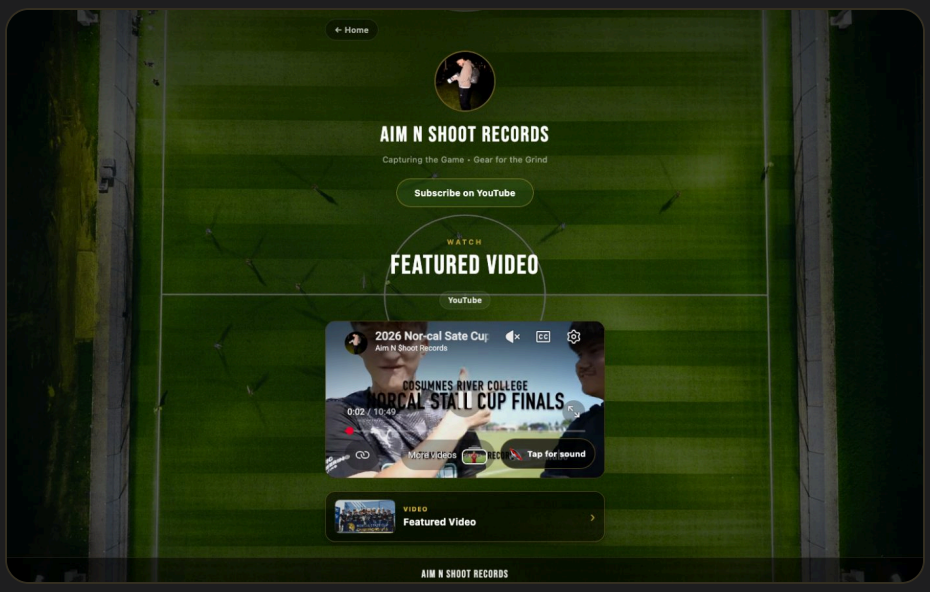

Store page

- Product price → controlled by Orders tab (Edit price)

- Product image is a static asset (`assets/images/grippysock2.jpg`)

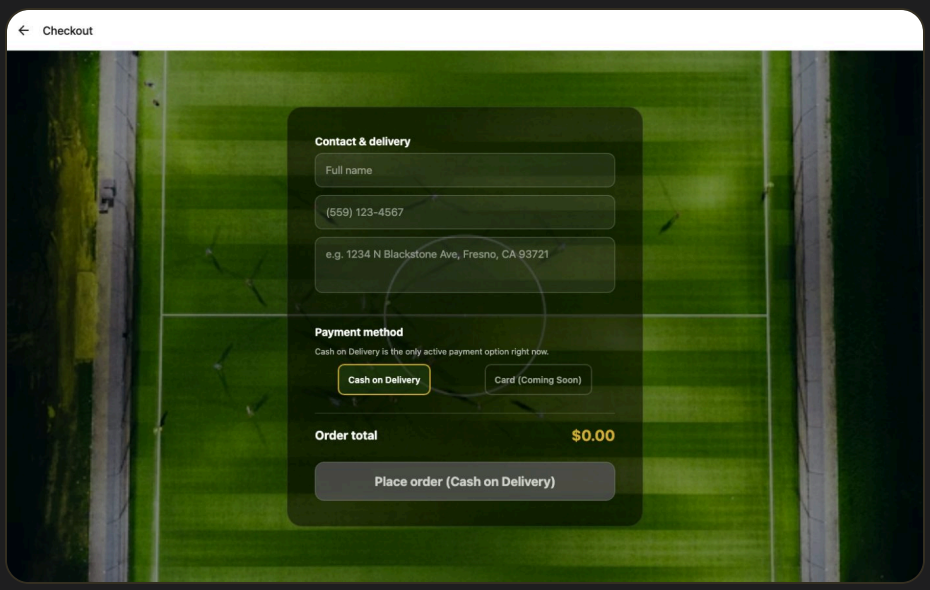

Linktree `/linktree`

Linktree page

- All video/channel links → controlled by Content tab (Linktree links)
- Featured video at the top → controlled by Content tab (Featured video)

Checkout `/checkout`

Checkout page

Customer-facing only. On submit:

1. A new order document is written to `orders` in Firebase Realtime Database.
2. Cloud Functions fire a push notification to all registered admin subscriptions.
3. The order appears immediately in Admin → Orders tab.

Quick Reference

Task	Tab	Where
