Your dashboard: what you can do, and what we can add later

Real Food by Maria · Updated November 9, 2026

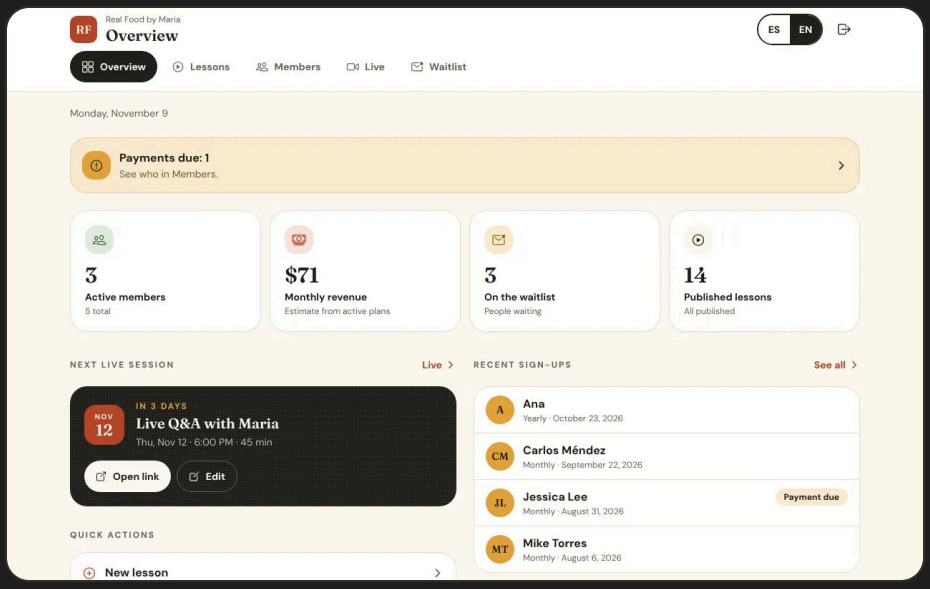

The dashboard is the private part of the platform that only you can open. It's where you add lessons, schedule live classes and see your members, without calling a developer. It works on the website and inside the app on your phone.

How to use this guide

Tab	What it's for
Overview	Your numbers today, anything that needs attention, the next live class
Lessons	Add, edit and publish lessons; upload videos, files and course covers
Members	See who's a member, their plan and payment status
Live	Schedule live classes with a Zoom or Meet link
Waitlist	People who asked to hear from you

You don't need to know anything technical. Every screen has the same few buttons: **Add**, **Edit**, **Save**.

Step 1 — Overview

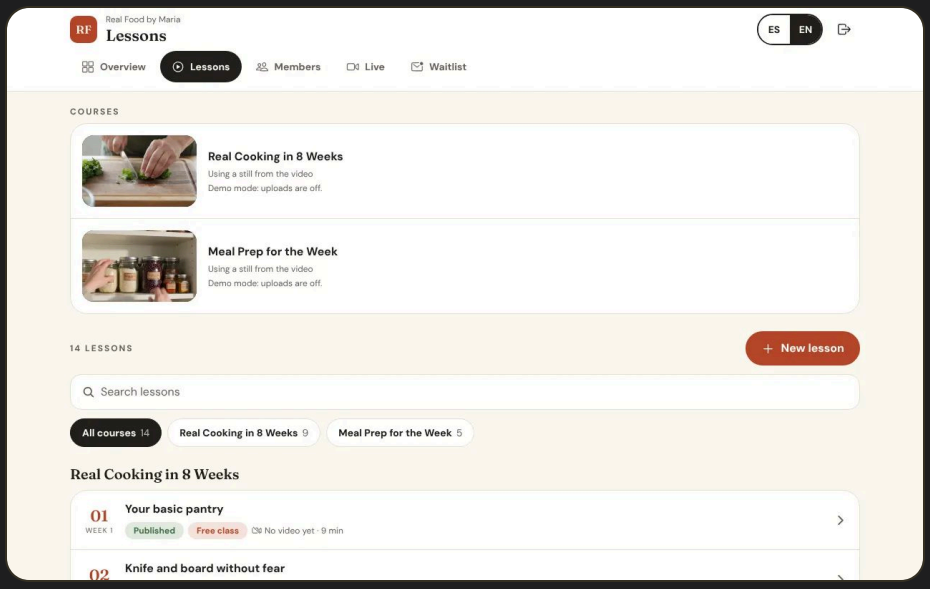

Overview

What you can do

- See active members, new members this month, estimated monthly income, waitlist and published lessons at a glance.
- Get a yellow alert when a member's payment failed, with one tap to see who.
- See your next live class, open its link, or edit it.
- Use shortcuts to add a lesson or a live class.
- See your latest sign-ups.

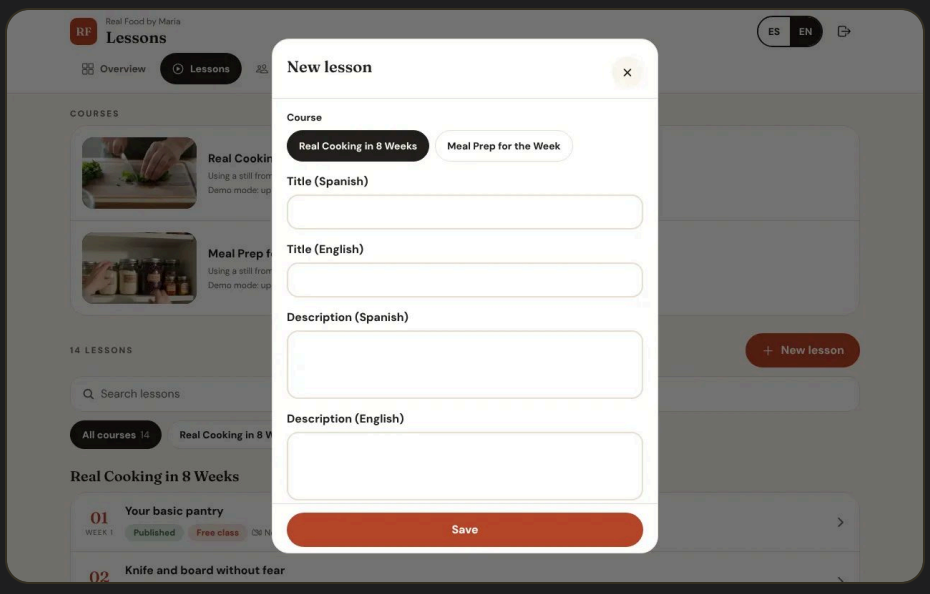

Step 2 — Lessons

Lessons

What you can do

- See every lesson by course, with a search box.
- See at a glance which lessons are **Published** or **Draft**, and which still need a video.
- Change each course's cover photo by uploading one from your computer or phone.
- Delete a lesson (it asks you to confirm first).

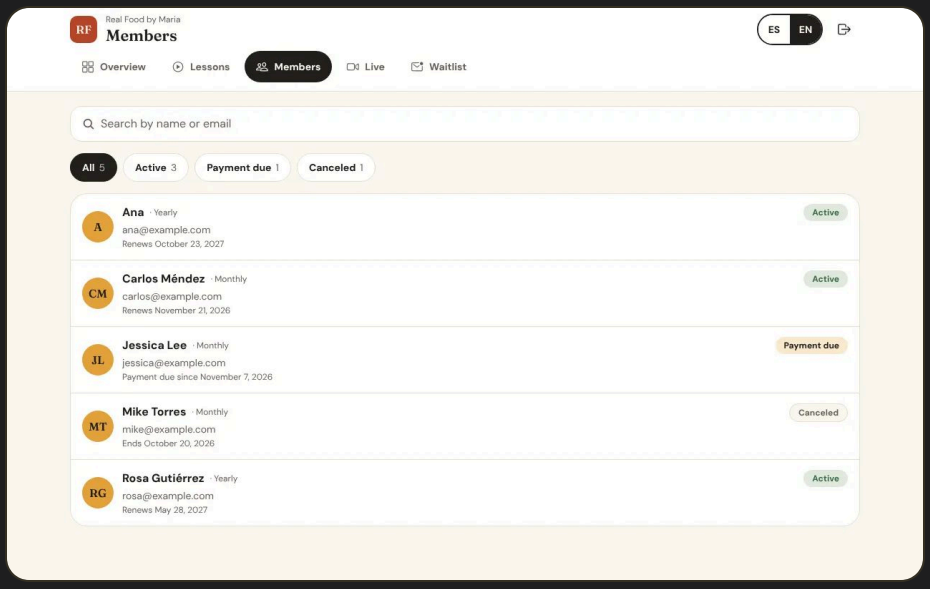

Lesson editor

Adding or editing a lesson

1. Tap **Add lesson**, or tap an existing one.

2. Choose the course and the week it unlocks.
3. Write the title and short description in English and Spanish.
4. Upload the video. It goes straight to private storage, no YouTube or Vimeo needed.
5. Add downloads (recipe card, shopping list, PDF) with a name for each.
6. Mark it as a **Free class** if anyone should be able to watch it.
7. Switch **Published** on when it's ready, then **Save**. Leave it off to keep it as a draft.

Step 3 — Members

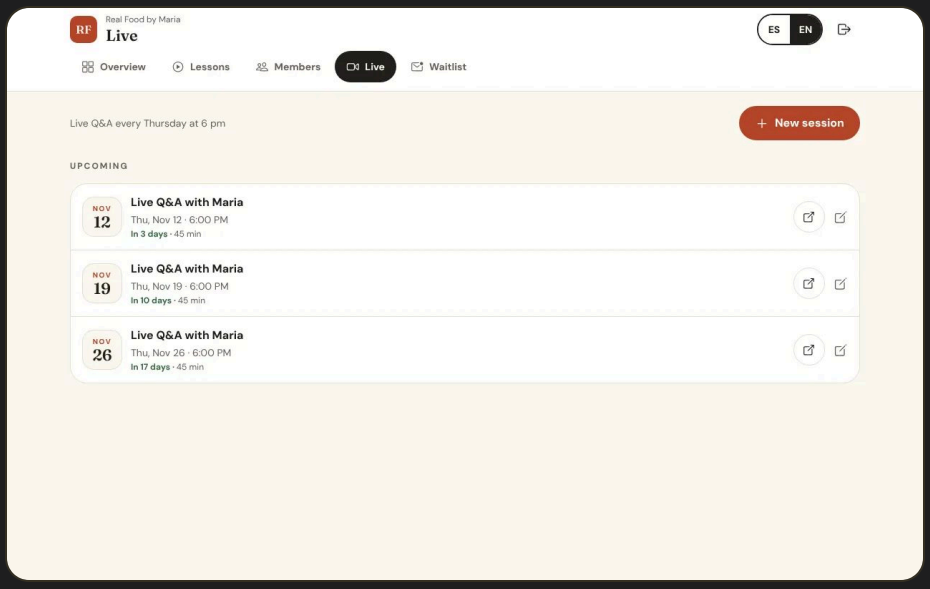

Members

What you can do

- Search members by name or email.
- Filter by **Active**, **Past due** (payment failed) or **Canceled**, with a count on each.
- See each member's plan and the date they renew, ended or became past due.

Memberships change only through payments, never by hand, so the list is always right. Refunds and cancellations you want to make yourself are done in your Stripe dashboard.

Step 4 — Live classes

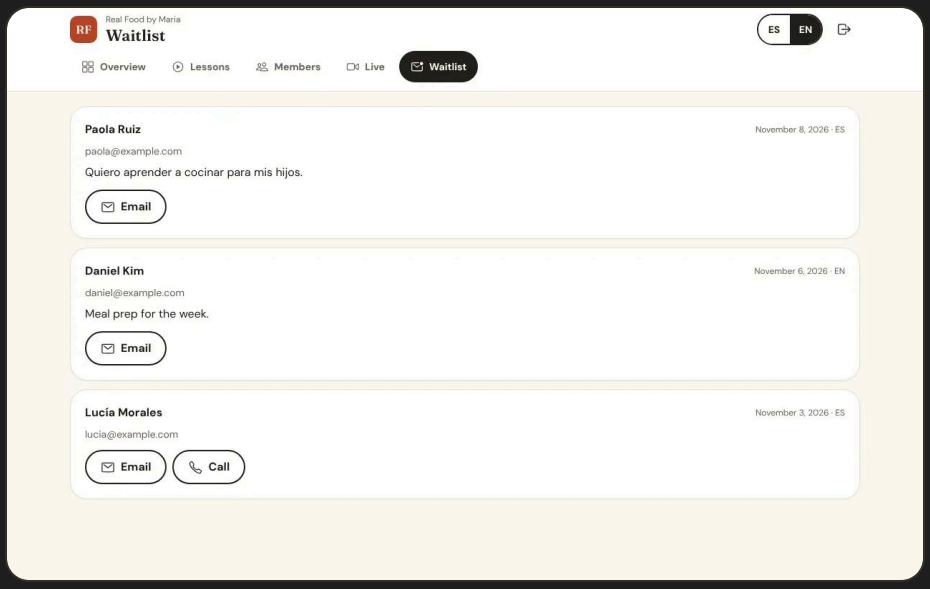

Live classes

What you can do

1. Tap **Add live class**.
2. Write the title in English and Spanish, and set the date, time and length.
3. Paste your Zoom or Google Meet link, then **Save**.

Members see it on their Live page right away and get an email reminder on the day. Past classes move to their own list.

Step 5 — Waitlist

Waitlist

What you can do

- See everyone who left their name and email (for example, before a new course opens).
- Email or call them with one tap.
- In the app on your phone, you can turn on alerts so you're notified when someone signs up.

What we can add later

These aren't part of the first build. Any of them can be added when you need it, and each one is quoted at that time. Some are included in the Standard and Priority care plans as your yearly major update (see **Price breakdown & care plans**).

Add-on	What it would do
Community	A members-only space to post photos of what they cooked, comment and ask questions
Quizzes and challenges	Short quizzes or 30-day challenges with check-ins
Certificates	A certificate when someone finishes a course
Recipe and meal-plan store	Sell single recipe packs, ebooks or meal plans without a membership
One-time courses	Courses people buy once and keep, next to the membership
Gift memberships	Someone buys a membership for a friend or family member
Discount codes	Codes for launches, holidays or partners
1-on-1 coaching bookings	Members book and pay for private sessions on your calendar
Email newsletters	Send updates to members and the waitlist from the dashboard
Member progress reports	See which lessons get watched most and where people stop
More languages	Add a third language beyond English and Spanish
