Your platform, page by page

Real Food by Maria · Updated November 9, 2026

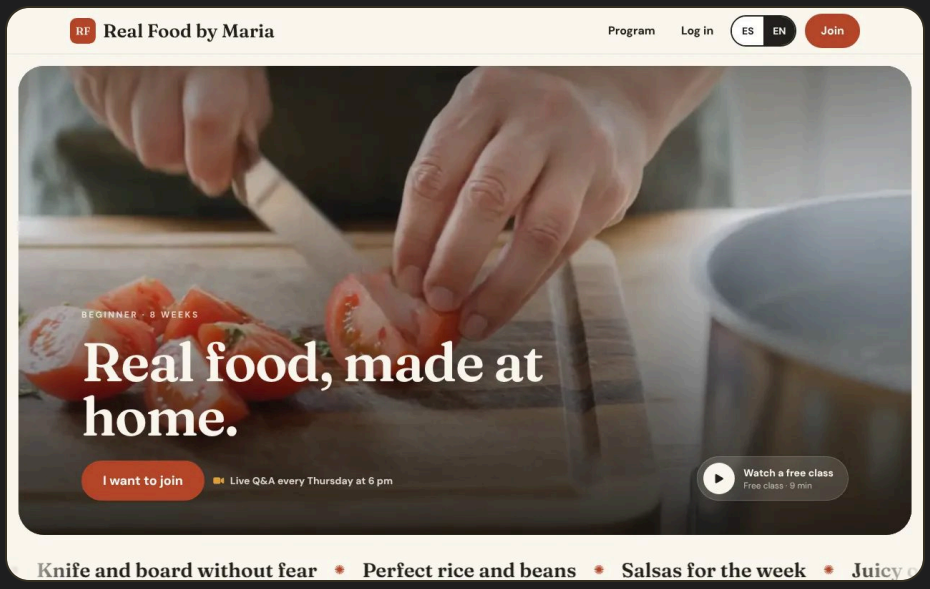

This guide walks through every page of the platform: what it shows, and what your visitors and members can do on it. The screenshots come from the demo at courses--maria.expo.app. Colors, photos and words will change once we build it with your real content.

How to use this guide

Part	Who sees it	Pages
Public pages	Anyone, before paying	Home, Courses, Course page, Free class, Join, Link page
Members area	Paying members, after signing in	Member home, Lessons, Lesson, Live classes, Account
Your dashboard	Only you	See the guide **Your dashboard**

The same platform runs as a website and as iPhone and Android apps. Members sign in once and their progress follows them on every device.

Step 1 — Home page

Home page

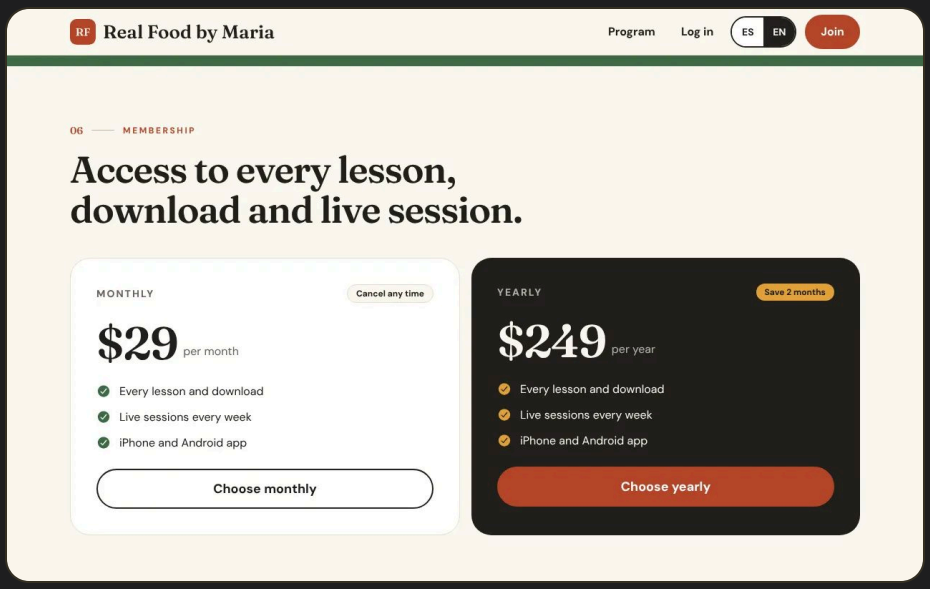

The first page people see from Instagram, Google or a shared link.

- **What it shows:** your photo or video, your name, one sentence about what you teach, and a button to join.
- **What visitors can do:** read about the program, see what a week looks like, compare plans, and read the questions people usually ask.
- **Language:** a switch at the top changes everything between English and Spanish. The site remembers the choice.

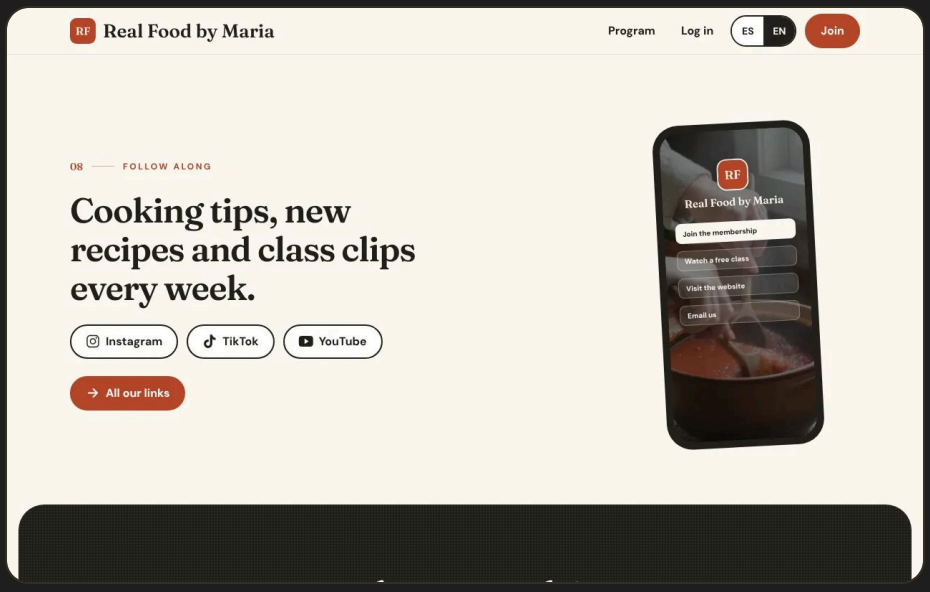

The program section

The program section explains how it works: new lessons each week, recipes to download, and live classes to ask questions.

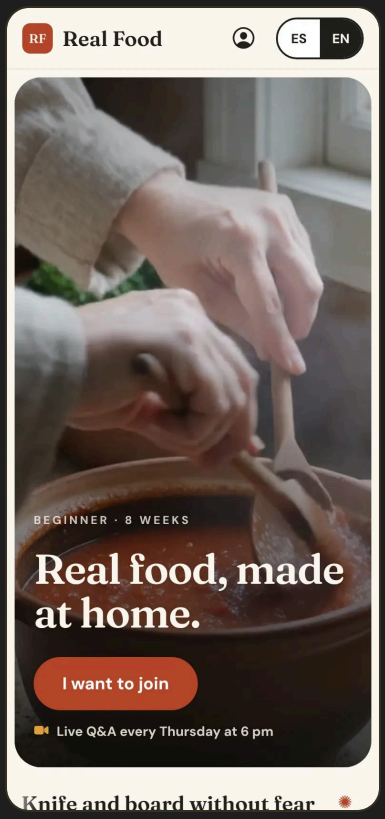

Plans

The plans section shows each membership with its price and what it includes, so people can choose before signing up.

Follow along

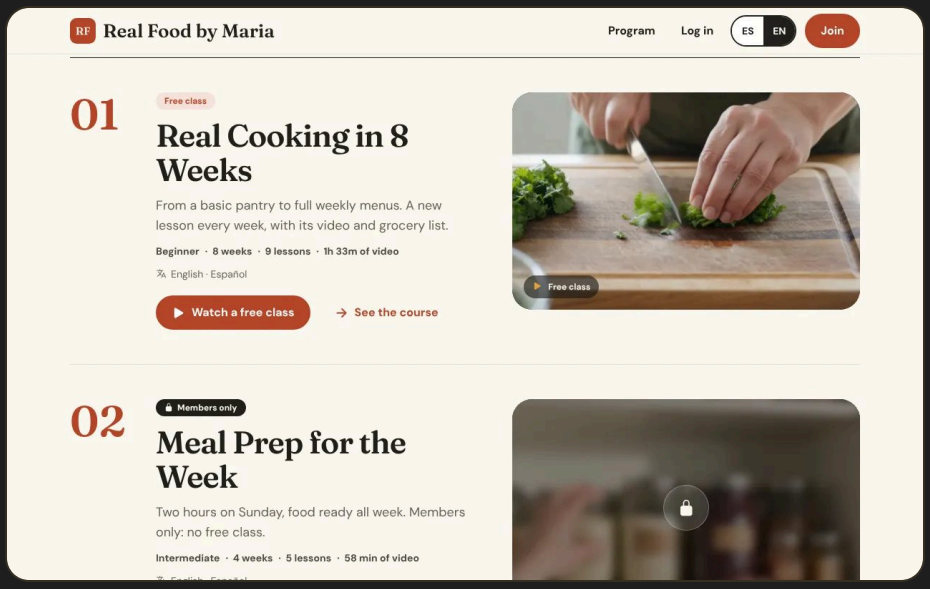

Follow along links to your Instagram, TikTok, YouTube and Facebook, and to your link page.

Home on a phone

Every page is built for phones first, since most visitors come from Instagram.

Step 2 — Courses

Courses list

- **What it shows:** all your courses, each with a cover photo, how many lessons it has, the total time, and the languages it's in.
- **What visitors can do:** open a course, or watch its free class right from the list.
- Courses for members only show a lock. Free classes are marked free.

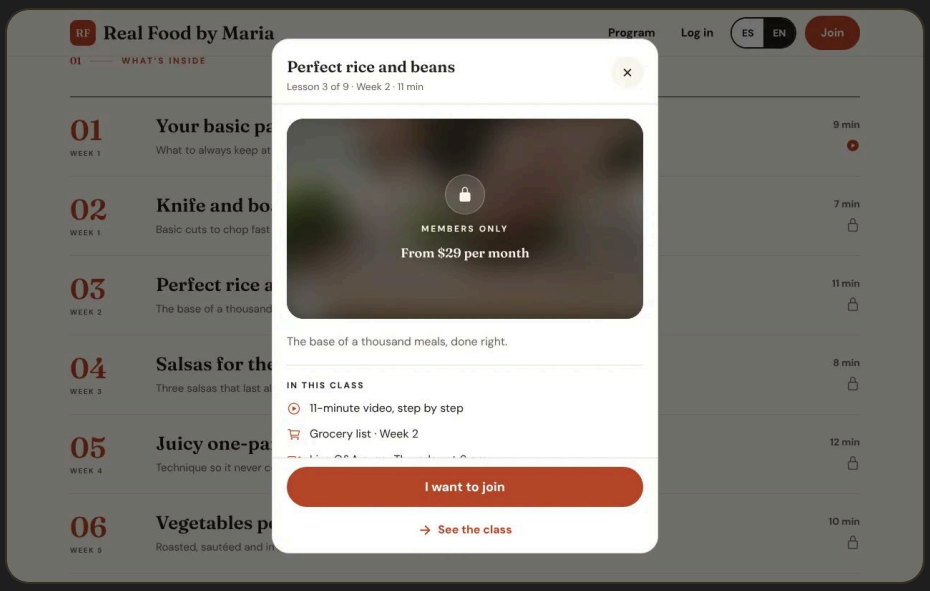

Step 3 — Course page

Course page

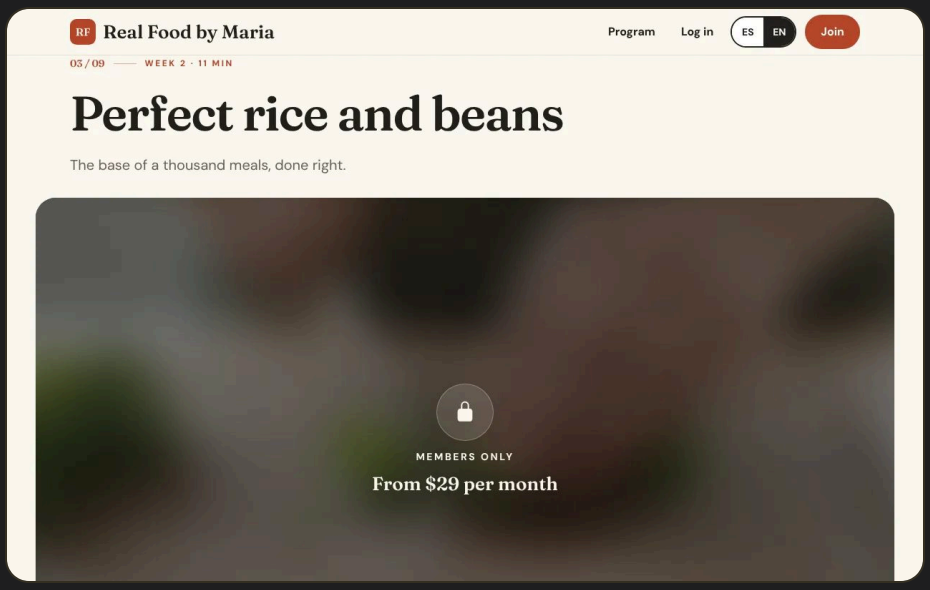

- **What it shows:** the course description, what students will learn, and the full list of lessons.
- **What visitors can do:** watch the free lessons, and see the titles of the members-only lessons so they know what they'd get.

Step 4 — Locked lessons

Join sheet on a locked lesson

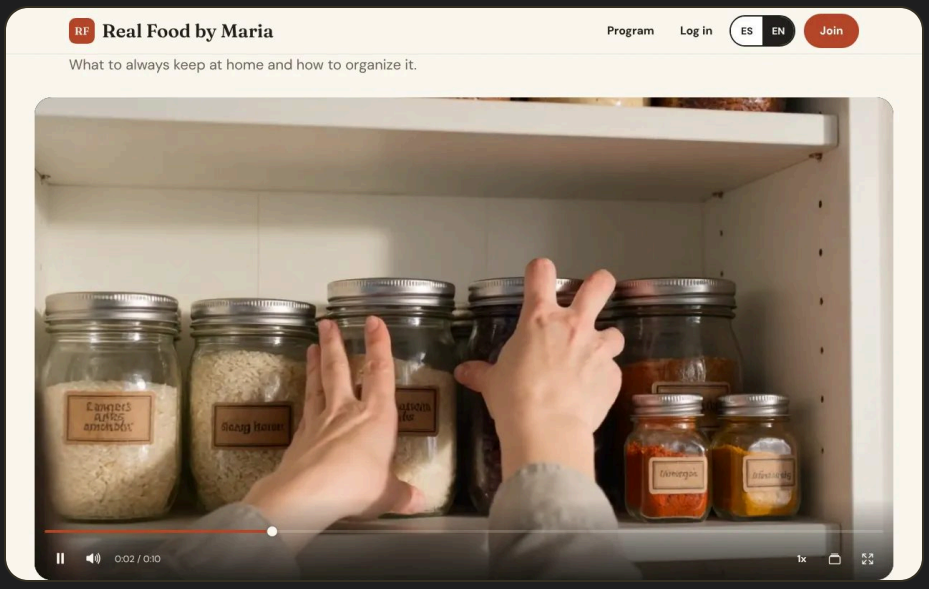

When someone who isn't a member taps a locked lesson, a short panel explains what membership includes and offers the plans. They never hit a dead end.

Locked lesson page

If someone opens a locked lesson from a shared link, they see its title and description with a button to join. The video and downloads stay private.

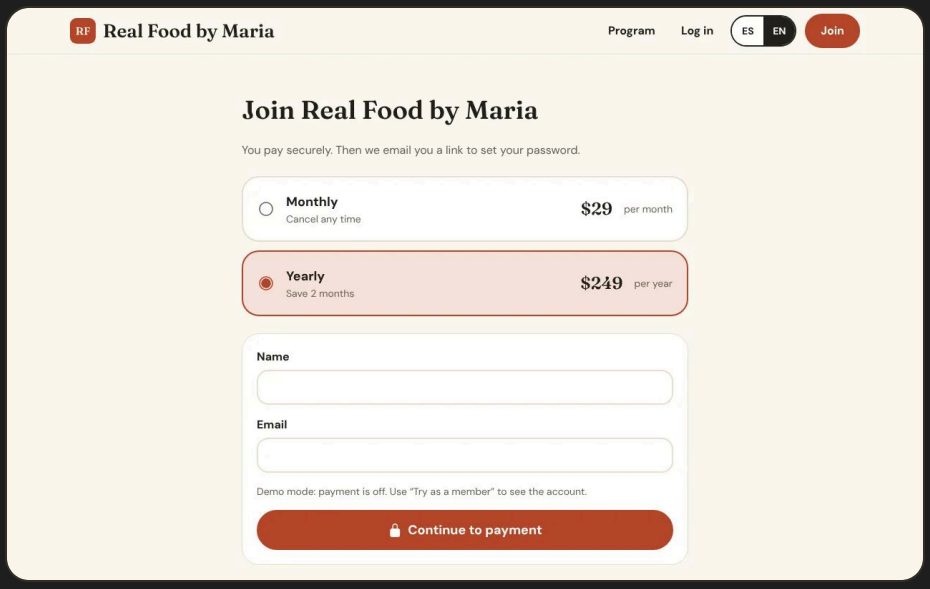

Step 5 — Free class and the video player

Free class in the player

- **What it shows:** your own private video player, with no download button.
- **What viewers can do:** pause, skip, go full screen, and change the speed. The video picks up where they left off, and their speed choice is remembered.
- Videos are stored privately. Each play uses a link that expires, so videos can't be copied and shared around.

Step 6 — Join

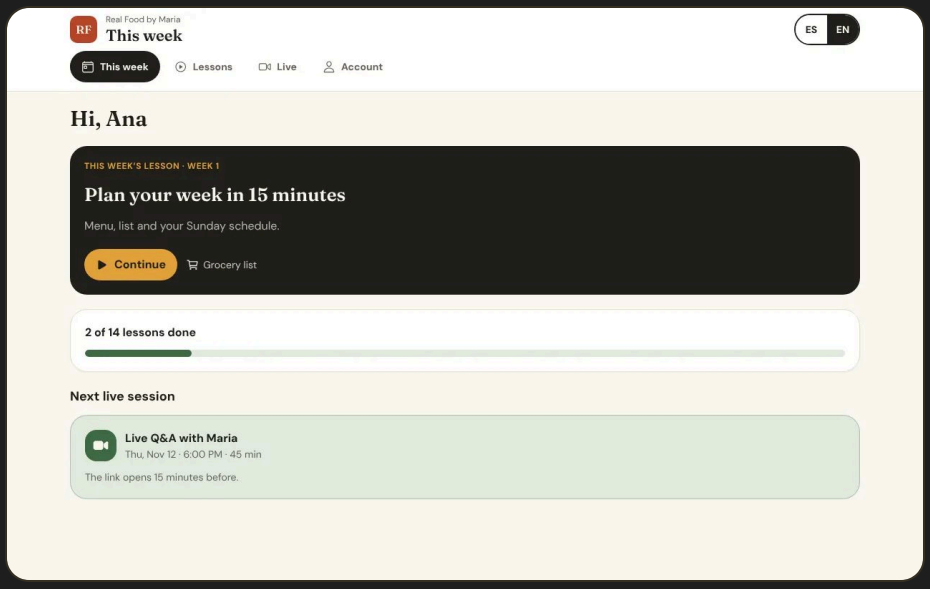

Join page

- **What it shows:** the plans side by side and what each includes.
- **What visitors can do:** pick a plan and pay with card, Apple Pay or Google Pay through Stripe. Their account is created right after paying.
- Payments go straight to your Stripe account. Members can cancel or change their card on their own.

Apple and Google take a cut of sales made inside apps. To avoid that, people join on the website, then sign in to the app with the same account.

Step 7 — Member home

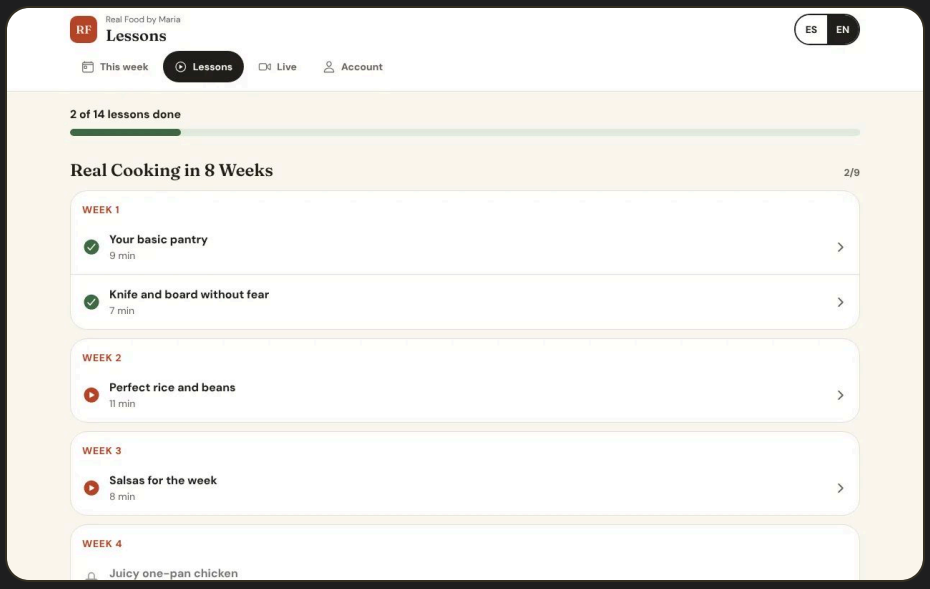

Member home

What members see after signing in.

- **What it shows:** the lesson to continue, this week's new lesson, and the next live class.
- **What members can do:** jump back into their lesson in one tap.

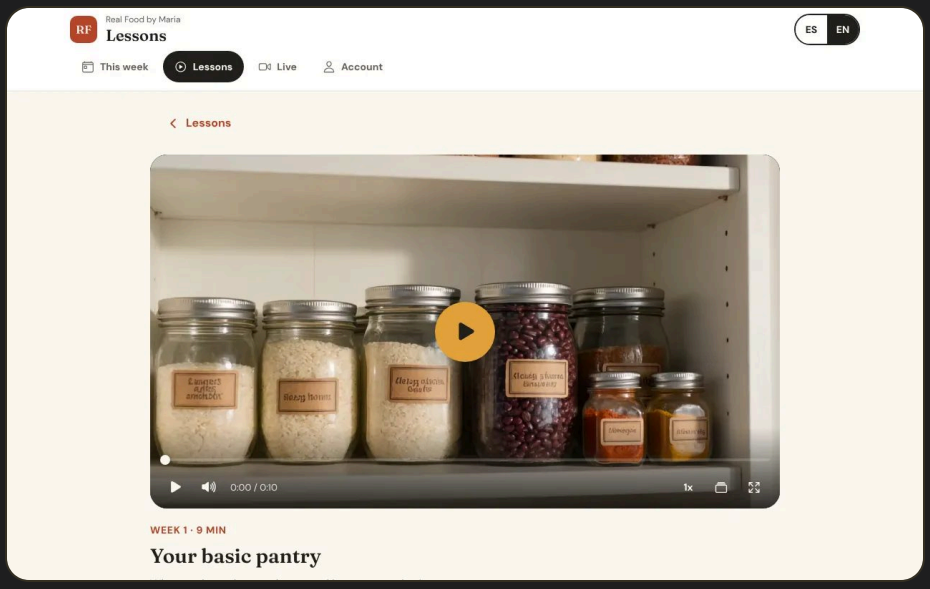

Step 8 — Lessons

Lessons list

- **What it shows:** every lesson they can watch, newest first, with the ones they've finished marked.
- Lessons unlock week by week, counted from the day each member joins, so new members start at week 1.

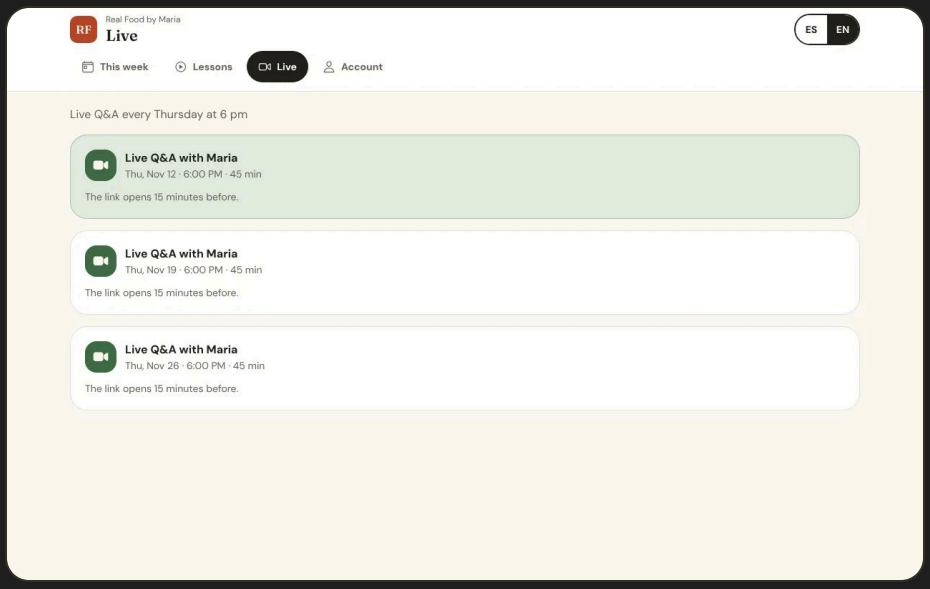

Step 9 — Lesson

Lesson page

- **What it shows:** the video, the written notes, and the downloads (recipe cards, shopping lists, PDFs).
- **What members can do:** watch, download the files, and mark the lesson as done.

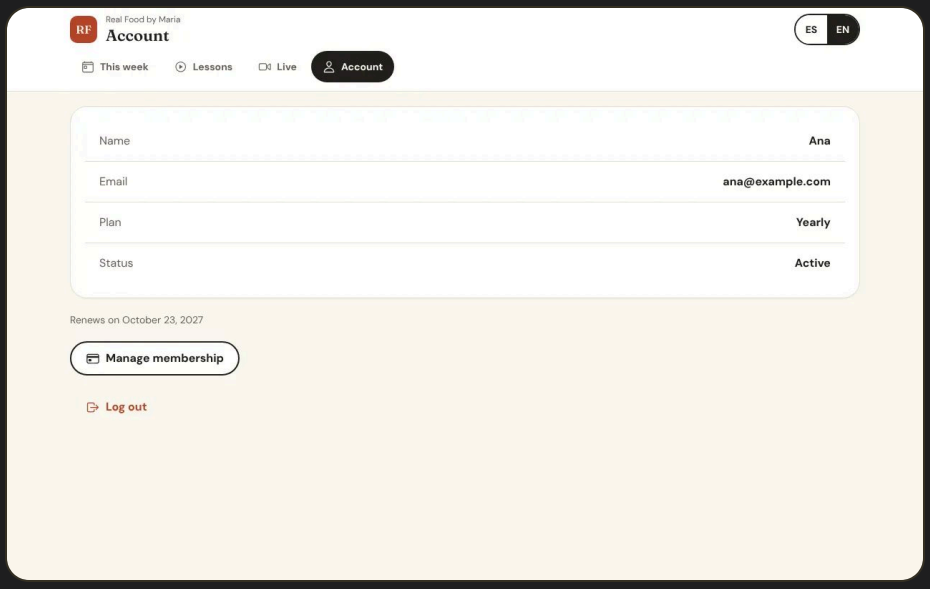

Step 10 — Live classes

Live classes

- **What it shows:** the upcoming live classes with the date, time and topic.
- **What members can do:** tap to join on Zoom or Google Meet when it starts. They also get an email reminder the day of the class.

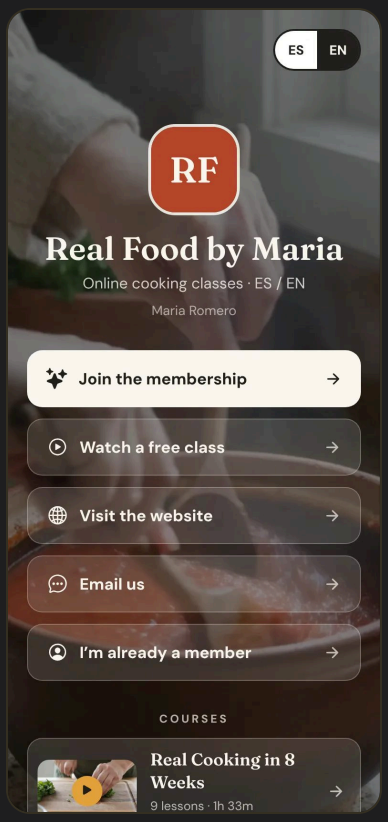

Step 11 — Account

Account

- **What it shows:** their plan, when it renews, and their language.
- **What members can do:** manage payment (change card, cancel) through Stripe's secure page, and sign out.

Step 12 — Link page (your Instagram bio link)

Link page

One link for your Instagram bio, with your photo and big buttons: Join, Free class, Website, Email, and course covers. It replaces Linktree and sends people straight into your platform.

Summary

Page	Visitors can	Members can
Home	Read, compare plans, switch language	Same
Courses / Course page	Browse, watch free lessons	Watch everything included in their plan
Video player	Free classes only	All lessons; resume and speed are remembered
Join	Pay and create an account	Change plan
Member home, Lessons, Lesson	—	Watch, download, track progress
Live classes	—	Join on Zoom or Meet, get reminders
Account	—	Manage payment, cancel, change language
Link page	Everything above, one tap away	Same
