Rizo Pizza — New Features Guide

Updated May 2026 · live app screenshots

Note from Ruben

Hey — I wasn't in a place to donate to the fundraisers this time, but I still wanted to show up for you. I built these updates in the app instead, to make ordering and running your pop-up a little smoother for you and your customers. Hope they help.

How to use this guide

Customers	Home → Menu → Cart → tip → Pay Now
Staff	Gear icon → login → dashboard
Banners	Event: home + menu · GoFundMe: home + cart

Step-by-step (current app screens)

Step 1 — Home page

What customers see on first load: open/closed banner at the very top, logo + gear icon, announcements, avg prep, and View Menu & Order.

Step 2 — Menu + pop-up event

Menu header with cart, status banner, compact upcoming event banner, and category filters — then menu items below.

Step 3 — Cook login + orders today

Tap the gear on home. Orders today shows here for staff only — removed from the public home page.

Step 4 — Cook dashboard

Manage Announcements for pop-up + GoFundMe.

Manage Announcements

- **Pop-up Event** (on/off) — Title, location, date, time, description, links
- **GoFundMe** (on/off) — Title, description, donate URL

Quick steps

1. Gear on home → password
2. Manage Announcements → Save
3. Toggle event or GoFundMe anytime
